

The salon software that finally keeps up with your front desk.

Booked appointments and walk-ins in one calendar. Checkout, tips and payroll that talk to each other. And a reports assistant you can simply ask questions — built for growing salons, priced for them too.

Just Ask AI
"How did Tess do on Saturdays last quarter?" — answered in seconds. No spreadsheets, no digging.

Walk-ins, Solved
A fair turn-rotation kiosk on iPad runs your walk-in line — alongside a full appointment book.

Payroll Built In
Commission, tips, 1099s and a Gusto bridge — included, not a costly add-on or a separate tool.

One Inbox
Texts, emails and chats with every client, threaded together — reply from one place.
